Project Description :

FlexDeals

FlexDeals Shopping Website

01 — **Why would you need such a platform?**

This platform makes online shopping as simple as possible and allows users to save both time and money.

**02** — **What does the website do?**

This website allows the users to access the products that are available in discount sales on various websites in one place.

03 — **How does the website work?**

The website provides a link with the product chosen by the user that redirects to the original website of the product

FlexDeals

PROJECT OBJECTIVES:

- To provide a customer with the best deal of the Products.

- Deals and offers are updated in real-time.

- User-friendly UI for smoother navigation and faster results.

- Supported in a large number of devices.

Work Distribution:

Somisetty Sai Praneeth : Python + Django

Sreedeva Krupananda B Reddy : Django + Python

Rohit Khetan : HTML + CSS + Bootstrap

Sri Hari L : Python + HTML

Soumya Ranjan Sahu : HTML + CSS + Bootstrap

FlexDeals

Future Plans

- Users can review and rate the product.

- Users can get view the price history of a particular product.

- Users can search the products over a fixed range of prices.

- Users can use the coupons for their purchases.

- Users can create a wishlist of products to track the price of. The user gets a notification where there is a change in the deal.

Thank you
